

The diagram illustrates the architecture of the DiedreMoire system, showing the flow of mail and data between various components.

Internal Clients: A group of 10 "LapTop" boxes, each connected to a "28K Dial-up" line. These are labeled "DiedreMoire Internal Clients".

PrimeHost Mail Server: A central box labeled "PrimeHost Mail Server" with the URL "www.diedremoire.com". It is connected to the internal clients and external clients.

External Clients: A group of 4 "External Client" boxes, each with an email address "client@theirmail". They are connected to the PrimeHost Mail Server.

Mail Processing Components: A series of boxes on the right side, each connected to a "28K Dial-up" line. These include:

- Chase101 Remove Collector
- Chase102 Send Mailer
- Chase103 Harvester
- Chase104 Harvester
- Chase101 Harvester
- Chase105 Harvester
- Chase106 Harvester
- Chase107 Harvester
- Chase108 Harvester
- Chase109 Harvester
- Chase110 Eudora Sort

Responses and VMS: A circular box labeled "Responses received at dmc22.com (recomnet)" is connected to the Chase110 Eudora Sort box. Below this box is the handwritten text "VMS -".

Connections:

- The PrimeHost Mail Server is connected to the internal clients and external clients.
- The PrimeHost Mail Server is connected to the Chase110 Eudora Sort box via a "Redirect to clients" line.
- The Chase110 Eudora Sort box is connected to the "Responses received at dmc22.com (recomnet)" box via a "Fwd Removes" line.
- The Chase110 Eudora Sort box is also connected to the "Responses received at dmc22.com (recomnet)" box via a "28K Dial-up" line.
- The Chase110 Eudora Sort box is connected to the Chase109 Harvester box via a "28K Dial-up" line.
- The Chase109 Harvester box is connected to the Chase108 Harvester box via a "28K Dial-up" line.
- The Chase108 Harvester box is connected to the Chase107 Harvester box via a "28K Dial-up" line.
- The Chase107 Harvester box is connected to the Chase106 Harvester box via a "28K Dial-up" line.
- The Chase106 Harvester box is connected to the Chase105 Harvester box via a "28K Dial-up" line.
- The Chase105 Harvester box is connected to the Chase101 Harvester box via a "28K Dial-up" line.
- The Chase101 Harvester box is connected to the Chase104 Harvester box via a "28K Dial-up" line.
- The Chase104 Harvester box is connected to the Chase103 Harvester box via a "28K Dial-up" line.
- The Chase103 Harvester box is connected to the Chase102 Send Mailer box via a "28K Dial-up" line.
- The Chase102 Send Mailer box is connected to the Chase101 Remove Collector box via a "28K Dial-up" line.
- The Chase101 Remove Collector box is connected to the PrimeHost Mail Server via a "28K Dial-up" line.
